Tuvu Baby & Toddler Hip Carrier

Important Safety Information

User Manual Notice

Please read and fully understand this manual before using the carrier. Failure to follow these instructions may result in serious injury or death.

Intended Use

The Tuvu Baby & Toddler Hip Carrier is designed for carrying one child on either hip.

It is intended for children aged 9 months to approximately 4 years and weighing 9–20 kg (20–44 lb).

Only use the carrier with a child who:

- ✓ Can sit unaided for the entire intended carrying time.
- ✓ Can hold their head upright independently.
- ✓ Does not exceed the maximum weight limit.

Consult a paediatrician before carrying a child under 1 year of age. For premature or low-birthweight babies, and children with medical conditions, consult a healthcare professional before using this product.

Any use other than that described in this manual is prohibited and may result in serious injury or death.

Warning! Fall & Suffocation Hazard

Fall Hazard

Children can fall out of the carrier.

Always position your child securely and ensure they cannot slide out.

Always keep one arm securely around your child.

The carrier provides support only.

Be aware that your movement and your child's movement may affect your balance.

As your child becomes more active, the risk of falling out may increase.

When leaning or bending, bend at the knees rather than at the waist.

Never leave your child unattended in the carrier.

Never place the carrier with your child inside on an elevated surface, such as a counter or table.

Suffocation Hazard

Do not secure your child too tightly against your body.

Allow enough space for your child to move their head.

Keep your child's face, mouth and nose visible and unobstructed at all times.

Ensure your child's chin is not resting on their chest, as this may restrict breathing.

Continuously monitor your child while using the carrier.

Important Warnings

Only use the carrier while walking, sitting or standing.

Never use the carrier during sports or other physical activities.

Do not use the carrier if your balance or mobility is affected by exercise, drowsiness or a medical condition.

Never use the carrier while under the influence of alcohol or drugs.

Do not use the carrier in water, including in showers or swimming pools.

Do not use the carrier while cooking, cleaning or performing activities near heat sources or chemicals.

Keep the carrier away from fire, hot surfaces and hot liquids.

Never use the carrier to transport your child in a vehicle, on a bicycle or on any other moving platform.

Do not allow your child to sleep in the carrier.

Never leave your child in the carrier when it is not being worn.

Check your child regularly to ensure they are comfortable and protected from the elements.

Provide sun protection, water or a hat when needed.

Take regular breaks to prevent discomfort or fatigue.

Before Every Use

- ✓ Inspect the carrier for ripped seams, torn straps or damaged hardware.
- ✓ Ensure that all buckles, straps and adjustments are securely fastened.
- ✓ If any damage or other issues are found, stop using the carrier immediately.
- ✓ If you are pregnant, consult your doctor before using the carrier.

IMPORTANT! Always position your child securely according to these instructions, with their legs supported in the recommended "M"

How to Use Carriers

1. Fasten the main buckle and secure it with the safety strap.
2. Loosen the main strap to create enough space for placing your child in the carrier.
3. Slide the carrier over your head and position the padded shoulder strap comfortably on your preferred shoulder.
4. Position the carrier seat on your hip.
5. While sitting or kneeling securely, lift your child and bring the carrier seat beneath their bottom. Position one of your child's legs in front of your body and the other behind you.
6. Stand up carefully while supporting your child with both hands.
7. Adjust the main strap so your child sits securely and close to your body.
8. Ensure your child is seated in the recommended "M" position, with their knees supported and bent at approximately a 90-degree angle.
9. Always keep one arm securely around your child while using the carrier.

Removing your Child from the Carrier

1. Sit or kneel securely and support your child with both hands.
2. Loosen and unfasten the main strap.
3. Gently lift your child while continuing to support them.
4. Carefully guide their legs out of the carrier one at a time.
5. Once your child has been safely removed, lift the carrier off your shoulder.

Always remove your child slowly and securely to ensure their comfort and safety.

Storage

Always remove your child slowly and securely to ensure their comfort and safety.

Care Instructions

Improper care will void all warranties. Always follow the international washing symbols on the care label inside the carrier.

Hand Washing

Gently swirl the carrier in lukewarm water using a mild liquid detergent.

Avoid detergents containing optical brighteners, as these may cause the colours to fade.

Rinse thoroughly in clean water.

Avoid rinsing the carrier directly under running water.

Drying

Gently press out excess water.

Do not wring.

Use a clean towel to absorb additional moisture.

Line dry in the shade.
